PROFESSIONAL SUMMARY

Driven back-end web developer with a successful track record in management and a certificate in full-stack web development from UC Berkeley.

TECHNICAL SKILLS

MERN stack, mongodb, nodeJS, express.js, ReactJS, JavaScript ES6+, python3, FLASK, noSQL, MySQL, CSS3, HTML5.

PROJECTS

AstroLog | <https://github.com/allister-seras/AstroLog>

This website allows users to create an account, generate horoscopes and tarot readings, and save them. You can then create journal entries where you can attach saved data. Finally, you can view all your entries.

- We used the MERN (MongoDB, express.js, react.js, and node.js) stack, taking advantage of Axios, bootstrap, partialJS, and the astrology API.
- This was a group project between five people.
- Developed the React components and pages and connected the backend using GraphQL queries.
- connected the backend using graphql queries.

MyPokedex | <https://github.com/allister-seras/MyPokedex> |

<https://my-pokedex-e8b7f991d27f.herokuapp.com/>:

This website allows users to create accounts, save Pokemon teams, search for Pokemon, and view stats.

- JS, express.js, node.js, MySQL, Sequelize, Axios, and Handlebars
- This was a group project between four people.
- Developed the API and ORM.
- Connected it to the pages on the front end.
- Handled event listeners

Social Media (Twitter backend clone): <https://github.com/nathansabin/social-network-ODM>

- This is the backend for a Twitter mockup. It allows you to create a user, friend other users, post thoughts, and comment on other people's thoughts.
- Sole author.
- Utilized Mongoose to create an ODM with mongodb, express.js, and node.js.
- The program uses a standard file structure for a REST API, including modularization to organize the routes.

EDUCATION

***Certificate in Full Stack Web Development
University of Berkeley, California Extension:***

March 2023 - September 2023

A 24-week intensive program designed to teach technical programming skills in Node.js, MySQL, mongodb, Express, ReactJS, OOP, PWA, HTML5, CSS3, JavaScript, JQuery, Bootstrap, and Handelbars.js.

EXPERIENCE

Coast Aluminum

Kent WA

CTL Operator/Team Lead

2021 - 2023

- Cut upwards of 40,000 lbs of metal a day for yacht, toolbox, and construction companies.
- Coordinate weekend days to ensure that we were able to keep up with work-load while having a small staff.
- Lead a small crew with up to five members.

Forklift driver

2020 - 2021

- Moved 8000 lbs of metal on the CTL machine an hour to allow the operator to move as fast as they felt comfortable.
- Built and weighed pallets in order to place our material on them.
